DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 13-28, drawn to a method and kit for the isolation and subsequent quantitative characterization of target biomolecules present in biological fluid, classified in class 436, subclass 518.
 - II. Claims 9-12, drawn to a method for the isolation and subsequent qualitative characterization of target biomolecules, classified in class 435, subclass 7.1.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the inventions require different method steps. Invention I is a method for quantitative characterization of target biomolecules and involves adding a known amount of internal reference standard of predetermined concentration to a sample of the biological fluid, whereas invention II is a method for the qualitative characterization of target biomolecules and invention II does not require adding an internal reference standard.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the

search required for one group is not required for other restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
